

e-GDS launches the new expected version of its solution, with a new Responsive BackOffice Interface and new functionalities to improve e-commerce and e-management in Hospitality.

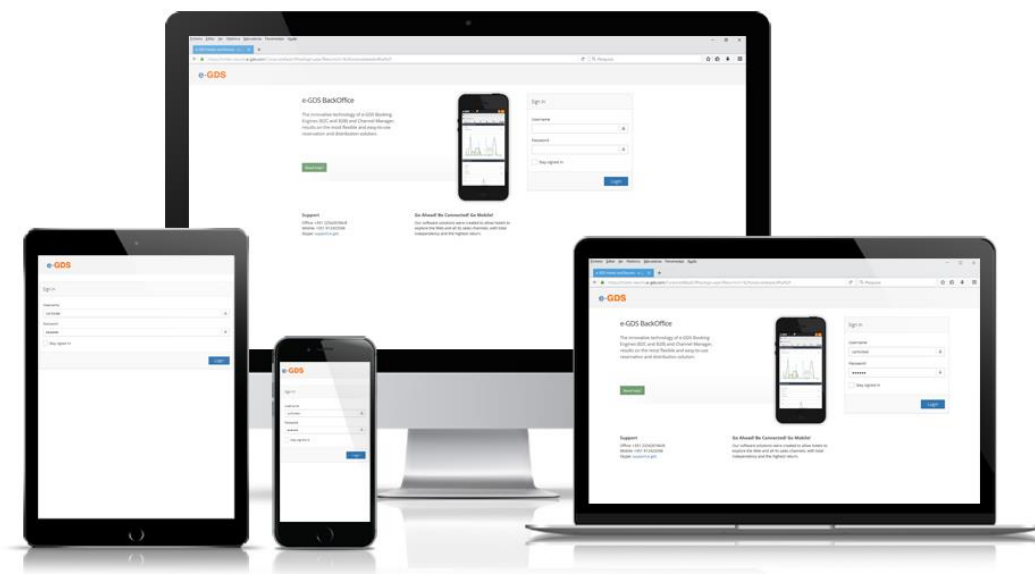

With a Responsive BackOffice and a Customizable Dashboard for a better user experience, this new version of e-GDS still have all the e-GDS functionalities available, balanced with new innovative features.

With a new interface (very intuitive and adaptable to any device) and essentially developed to optimize daily operations and business, we are launching some new possibilities with e-GDS for User BackOffice Experience, for Booking Engine FrontEnd and also for Channel Management.

The result of +15 years of market knowledge & analysis to improve the hotelier experience is this new version of e-GDS Platform that combines marketing features as *Conversion Pop-Up*, *Customer Satisfaction Survey* or *Self-Customizer Frontend Layout* for engagement, *Guest Reviewer* for Reputation Management, with some e-Commerce and Yield Features as *Master Rates* or even *Rate Shopping*.

These new possibilities increase the previous version that include, per example, Massive and Bulk Operations, Centralized Rates & Inventory Management and 100+ and growing certified XML connections with all major OTA's, Wholesalers and Metasearchs.

e-GDS Presentation

e-GDS is a complete and fully integrated platform with multi-service, multi-product, cross-selling and multi-hotel features.

Empowered with Social Network, Responsive Booking Engines and a Channel Manager with certified integrations, **e-GDS platform** is a fully Hotel Booking System that allows you to take full potential of Internet Sales: enhance your Internet Sales Distribution, Maximize Revenue and Cut Down Costs!

e-GDS software solutions were created to allow hotels to explore the Web and all its sales channels, with total independency and the highest return. Obvious results in terms of optimizing management and volume of sales!

e-GDS allows you to sell any kind of additional product or service with or without your rooms, increasing your businesses.

Combining low effort management with automatic update on all online sale channels; independent online presence with the hotel own brand at low costs, truly dynamic packaging with a responsive booking engine, the **e-GDS Integrated Solution platform** is a set of powerful tools that enable strategic growth.
